Quick Guide

Smart Light-guided coffee scale

pourxlab.com/manual

⚡ Before first-time use, charge for 4 hours.

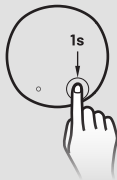

0:18.42

Weighing Mode

0.0
(weight)

It is a highly-precise weighing scale that responds to a weight from 0.1 to 2000 grams.

1. [Press]  to **turn on / off**.

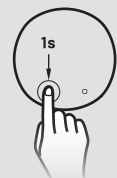

2. Place empty container and [Press]  to tare the weight.

3. Pour coffee beans into container to measure the weight.

Light-guided Mode

In **Light-guided Mode**, simply follow the lights to perform the coffeebrewing process : pour water, pause, continue (adjusting the flow of water). You can easily get the same, stable quality coffee each time.

1. [Press] to **turn on / off**.

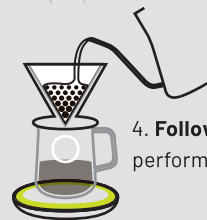

2. [Click] + at the same time to **switch** between 3 different built-in recipes.

- Recipe * * * = **Sour**
- Recipe * * = **Balanced**
- Recipe * = **Strong**

3. [Click] to **Start / Restart** pouring, and it will begin to light up in white.

4. **Follow the lights** to perform the brew process.

Lights (Brew) Indicator

(white light) **Ready / Finish**

Light Indicator

(green light) **Start / Continue** pouring
(rotate: great / flash: more / pulse: less)

(red light) **Stop pouring** and **wait**

(purple light) **Stir** the slurry

Pour Over Mode

(State Indicator: ●)

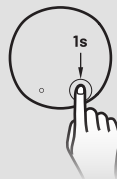

0:00

(time)

0

(weight)

It displays precise time and weight information during the brew process. When detecting the flow of water, it will start **timing automatically**.

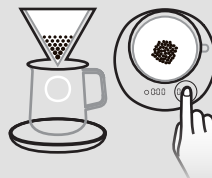

1. [Press] to **turn on / off**.

2. [Click] + at the same time to switch mode :

Weighing Mode
↓
Pour Over Mode

3. [Click] to **tare**, and start pouring.

4. When the scale detects the flow, the timer starts automatically.

[Click] to **stop timer**.

5. When timer stops, [Click] to **reset the timer & the weight**.

State Indicator

✳ Bluetooth connection with smartphone
